

Poll Wagyu Premier Sale

FEMALE LOT - SEMEN INCLUSION

Poll Wagyu is committed to the genetic excellence in Poll Wagyu and as a result we are including some exclusive semen for your first mating/flush. Based on our data and knowledge, we believe these sires will compliment the specific females. If we were retaining these females, these would be our breeding choices. Poll Wagyu is including 1 straw of exclusive semen for every Female Lot that is sold. Each successful purchaser will have the option of taking a straw from the nominated Poll Sire, or a straw of semen from the nominated Fullblood Sire.

Disclaimer:

- Semen straws are a selection of one of the two straws nominated.
- The successful purchaser must nominate semen inclusion A or semen inclusion B within 24 hours of the sale in writing.
- All semen collected at an export qualified facility can currently be used to produce embryos for countries with protocols, including the EU. Domestic semen will not qualify to produce export embryos.
