### **Veterinarian Certificate**

I, Elliot O'Farrell examined two heifers for Mayura station in Millicent SA.

After clinical examination and rectal palpation of the reproductive tract which was anatomically correct including, uterus, ovaries and cervix. Therefore under my clinical judgement I cannot see a reason for these animal's not to be bred.

The following heifers tag numbers were noted:

PWYP22T1456A  
PWYP22T1401A

Yours sincerely,
